AED UNITS

The breakthrough in design technology makes it possible for every budget to afford a life-saving AED

Now only £ 895 + vat

Mere seconds can mean the difference between life and death. So we created an eye-catching AED (Automated External Defibrillator) that can be located instantly. One that can be carried to the patient quickly without fumbling. One that can be used with minimal steps to analyse and treat the patient's condition.

From the moment someone suffers sudden cardiac arrest the inspired design features of the Lifeline AED shave precious seconds off the defibrillation process. Seconds that save lives.

Brilliant Design

With its bright yellow and black colouring and attractive sleek curves, the non-intimidating Lifeline AED invites prominent display anywhere.

Latest Technology

The biphasic defibrillation we use is extremely effective at defibrillating patients in ventricular fibrillation - the most common form of Sudden Cardiac Arrest - on the first shock.

Easy to Use

The Lifeline AED is designed for speed and simplicity. Built to the demanding standards of professional emergency personnel. Simple enough for non-medical users.

Lightweight, Durable

At just 4.2 pounds a child could carry it. Plus, the Lifeline AED meets US Military "drop and shock" specifications.

We Supply the AED Units Worldwide

HANDLE THIS

Roomy, sure-grip rubberized handle makes it simple to pull off the wall and carry quickly to the patient.

TEXT, LIGHTS AND VOICE GUIDES

A calm voice guides the responder step by step while a text display with lights shows the progress.

PADS AT THE READY

The electrode pads are tucked into a back pocket ready to apply.

BIG BUTTONS

The "Power On" and "Shock" buttons are oversized and brightly lit so even the most nervous fingers will hit their mark.

AED TRAINER UNITS

AED Trainer

Over 150,000 people die from cardiac arrests in the UK each year. The majority might be saved if only their heart could be defibrillated (shocked back into a rhythm) within five minutes. An Automated External Defibrillator - with a trained operator - at the site of sudden cardiac arrest can raise the chance of survival from 5% to 80%. For every minute following onset of sudden cardiac arrest, the chance of that person's survival drops by 10%. As such, waiting for an ambulance for just 6 minutes will reduce the opportunity for more than half of all casualties to receive a successful resuscitation outcome.

The Standalone AED Trainer can be used to instruct students in the various operating modes of Defibtech DDU-100 series AEDs, and in the use of an AED as part of a standard rescue protocol. The DDU-100TR is similar to a functional DDU-100 series AED in form and operation, but all rubberised exterior surfaces are red, instead of black, to clearly distinguish the unit as a training device that cannot be used to defibrillate a real patient.

Now only £ 285 + vat

We Supply the AED Trainer Units Worldwide

The Standalone AED Trainer is sold as part of the DCF-350T Standalone Training Package, which includes the following:

- DDU-100TR Trainer AED
- DBF-RC2 Training Battery (rechargeable)
- DTR-201 Training Battery Charger
- DDP-100TR Adult Training Pads
- DTR-400 Remote Control
- Also available: DDP-200P-TR Child/Infant Training Pads

AED ACCESSORIES

	<p>Adult Defibrillation Pads Package DDP-100A</p> <p>This package contains one pair of adult defibrillation pads for use with the Lifeline AED. These pads are for adult use only (8 years or older). Pads should be stored connected to the AED. Extra pads can be stored in the available carrying case. Pad package has a two-year shelf life.</p>	<p>£25.00</p>
	<p>Child/Infant Electrode Pads DDP-200P</p> <p>This package contains one pair of child/infant defibrillation pads for use with the Lifeline AED. These pads are for use on infants and children to the age of 8. Pads should be stored connected to the AED or in the available carrying case. Pad package has a two-year shelf life.</p> <p>Use Child/Infant Electrode Pads only with Defibtech Defibrillators with software version 1.203 or later. Information on software updates can be obtained from your AED sales location.</p>	<p>£60.00</p>
	<p>Extra 5-year battery pack or 7-year battery pack 5 year DCF-200 or 7 year DCF-210</p> <p>The replacement battery pack has a standby life (installed in the unit including daily, weekly, monthly and quarterly self-tests) of the following.</p> <p>5 years (125 defibrillation shocks, or 8 hours of continuous operating time) 7 years (300 defibrillation shocks, or 16 hours of continuous operating time)</p> <p>Each battery pack comes with a new DAC-410 9-volt lithium battery.</p>	<p>5 year £ 95.00</p> <p>7 year £ 120.00</p>
	<p>We have 4 types of Data Card as follows</p> <ol style="list-style-type: none"> 1.) Medium Data Card (6-hours storage ECG data, no audio) DDC-6 2.) High Capacity Data Card (12 hours storage ECG data, no audio) DDC-12 3.) Medium Data Card (records 50 minutes of Event Audio) DDC-50AE 4.) High Capacity Data Card (100 minutes, Audio) DDC-100AE 	<p>£ 45.00</p> <p>£ 55.00</p> <p>£ 45.00</p> <p>£55.00</p>
	<p>Event Review Software CD-ROM, Beta Version DAC-610</p> <p>DefibView software supports event review for Defibtech AEDs. Event Review allows medical oversight personnel to reconstruct the sequence of events for a given emergency.  Download it here</p>	<p>CD Rom Version</p> <p>£ 8.00</p>
	<p>DDC Card Reader DDC-CR1</p> <p>This card reader plugs into the USB port of any windows-based PC and accepts all Defibtech cards for downloading event data after the Lifeline AED has been used.</p>	<p>£ 45.00</p>

AED TRAINING ACCESSORIES

	<p>Adult Training Pad Package (1 set) DDP-100TR</p> <p>These training pads, along with a training battery pack and training software, enable the Lifeline AED or standalone trainer to be used for instructional purposes. The training pads are semi-adhesive, allowing for multiple uses and are non-functional so they cannot be used to deliver a defibrillator shock.</p>	£ 20.00
	<p>Child/Infant Training Pad Package (1 set) DDP-200P-TR</p> <p>These training pads, along with a training battery pack and training software, enable the Lifeline AED or standalone trainer to be used for instructional purposes. The training pads are semi-adhesive, allowing for multiple uses and are non-functional so they cannot be used to deliver a defibrillator shock.</p>	£ 55.00
	<p>Training Battery Pack DPB-RC2</p> <p>This is a replacement training battery pack for packs sold with the DCF-350T Standalone Trainer and the DCF-302T and DCF-303T training packages. The training battery is rechargeable.</p>	£ 95.00
	<p>Training Battery Pack Charger 230v/50HZ (Europlug) DTR-202</p> <p>This 230v/50HZ wall charger with a Europlug is for use in re-charging the DBP-RC2 rechargeable training battery.</p>	£ 28.00
	<p>Training Remote Control DTR-400</p> <p>This remote control can be used to control up to four standalone trainers or Lifeline AEDs with training battery packs installed. The remote control can be used to adjust speaker volume, for scenario selection, and for manual simulation of ventricular fibrillation, asystole, patient motion, normal sinus rhythm or incorrect pad placement.</p>	£ 33.00

AED STORAGE UNITS

	<p>Soft Carrying Case DAC-100</p> <p>This carrying case is designed to hold a Lifeline AED, extra sets of pads, an extra battery, and other accessories as needed. The case is made of ballistic nylon and has a carrying handle and a highly reflective safety strip.</p>	£ 60.00
	<p>Trainer Soft Carrying Case DAC-101</p> <p>This case is designed to hold a Trainer AED and accessories. The case is made of ballistic nylon and has a durable carrying handle. The distinctive red colour matches the colour of the Trainer AED and together with the embroidered "Trainer" label clearly indicates that the unit inside is a training device that cannot be used to defibrillate a real patient.</p>	£ 60.00
	<p>Wall Mount Case DAC-210</p> <p>This cabinet allows a Lifeline AED to be mounted on a wall to increase visibility and to protect the AED from theft or damage.</p>	£ 195.00
	<p>Wall Mount Case (Alarmed) DAC-220</p> <p>This cabinet allows a Lifeline AED to be mounted on a wall to increase visibility and to protect the AED from theft or damage. A loud alarm will sound whenever the cabinet is opened.</p>	£225.00
